

Hello from Mike Lindell,

Elections have serious consequences. Rising gas prices, massive inflation, and either \$10 eggs or no eggs in the supermarket? The current selected administration seems to be doing everything they can to destroy our country. But you know what? People are waking up! This isn't right and the majority knows it!

As promised, my team has been watching everything! One of our Computer Experts, Jeff O'Donnell was tracking the 2022 election in real time. What did we see? For starters, more votes than voters and impossible voter ballot drops that kept democrats ahead all night. Everyone knows that republicans are the ones who show up on election day, and democrats, largely, use the mail in ballot system. There are thousands of reports from across the country of problems with machines and ballot stuffing. Jeff O'Donnell's graphing of these real time machine drops can be seen here: [www.frankspeech.com](http://www.frankspeech.com)

**I want to remind everyone, republican and democrat alike, the stealing of our voices is not new.**

Clint Curtis a former employee of NASA and a computer programmer, who was a surprise guest at the Moment for Truth Summit, a Democrat who voted for Joe Biden has told us publicly that he was responsible for developing the algorithm that could be used to steal elections!

In 2000, Mr. Curtis was approached by Speaker Tom Feeney of the Florida House of Representatives to make a program for touch screen voting machines that could be manipulated. He thought he was creating it to secure and test voting machines.

The undetectable software worked, and Mr. Curtis gave the software to Feeney. However, he was shocked to learn that his software was used for what he believes to be malicious reasons in the 2004 election. He noticed a pattern that looked very suspicious and consistent with the software he created. [--Clint Curtis Speaks at Mike Lindell Summitt--](#)

Twenty years later, electronic voting machines are still a major threat to our Democracy. And Florida has even made it illegal to count paper ballots! Policies like this have to be changed, for the future of our Country! That's what the Lindell Legal Offense Fund is doing!

I am speaking the truth about election fraud and electronic voting machines. The work we have done the last 2 years has prepared us and we continue to take actions to stop the use of these electronic voting machines!

**[I know I'm on the right side of history, and we're going to win!](#)** Will you stand with me?

***Help the Lindell Legal Offense Fund secure our elections and end the use of machines to count our votes! We are fighting for the truth, and we URGENTLY need your financial assistance!***

**[Please donate \\$75, \\$100, \\$150, \\$300, or \\$650 today to the Lindell Legal Offense Fund. Every dollar you donate will fund this critical battle against the corrupt FBI!](#)**

God bless,  
Mike Lindell
